GLOSSARY OF TERMS

Crisis: Substance Use Disorder crisis services provide withdrawal and stabilization services in a short-term inpatient program aimed to engage and increase motivation and successfully link the person to the appropriate ongoing treatment.

Detoxification: A medical procedure employed by NYS certified medical or substance use disorder providers to remove the effects of a toxic substance from or to free from dependence on one or more substances such as alcohol, heroin or other opiates.

Opioid Treatment Programs: NYS certified outpatient programs that dispense medication (Suboxone or Methadone, etc., and provide other treatment services such as: individual and group therapy, medication management, medical and psychiatric services and vocational services for those with opioid dependence.

Outpatient: NYS certified outpatient substance use disorder treatment services provided in a community-based setting according to an individualized assessment and action plan based on the needs of the person.

Inpatient: NYS certified providers of substance use disorder treatment include intensive evaluation and short-term (average stay 21 days) treatment and rehabilitation services in a medically supervised 24 hours/day, 7 days/week setting.

Residential: NYS certified residential providers assist individuals with a substance use disorder who are unable to maintain abstinence or participate in treatment without the structure of a 24-hour/day, 7 day/week residential setting, and who are not in need of acute hospital or psychiatric care.

Outpatient Day Rehab: NYS certified outpatient substance use disorder treatment services provided in a community-based setting according to an individualized assessment and action plan based on the needs of the person. Some programs specialize in adolescent services and accredited education in an on-site alternative school.
